# Chilled Filtered Water that Tastes as Pure as it Should

## **Zip Filtered Water - a Healthy Alternative**

Zip chilled, filtered water systems are a healthy alternative to bottled water at a fraction of the cost so you can enjoy cool refreshing drinks without having to worry about constantly having to deal with bulky water bottles or waste valuable space for bottle storage.

## **Chilled Filtered Water that Tastes as Pure as it Should**

Every Zip chilled water system comes with a choice of five or sub micron carbon filters.

Zip five micron carbon filters reduce dirt, rust, asbestos fibres and other particulates such as oxydised iron, manganese and sulfides that can contaminate drinking water. They also eliminate offensive odours by reducing chlorine and other chemicals.

Zip sub-micron carbon filters also reduce parasitic protozoan cysts such as giardia, entamoeba and cryptosporidium.

The result is fresher, better-tasting drinking water.

## **Zip Filtered Water is Safer too**

With Zip chilled filtered water systems you'll no longer run the risk of back injury caused by lugging around, storing and installing heavy water bottles. In fact you'll never have to change a bottle again.

All Zip systems are equipped with a pressure surge protection system designed to protect delicate filter cartridges from pressure surges occurring in water mains. This is an important safety feature as surge-damaged filter cartridges may leak or fail to continue filtering as intended.

## **Warranty**

Zip chilled water systems come with a 12 month parts and labour warranty.

# Wall Mounted Systems

Zip wall mounted and recessed systems are the ideal solution for providing chilled filtered water in busy public or private areas.

### Zip Chill Fountain

Zip Chill Fountain is the most versatile chiller around for public areas in locations such as airports, colleges and hospitals.

It comes in a wide variety of single or twin bowl configurations to suit adults, children or wheelchair users and delivers 140 glasses of chilled filtered water per hour.

The system is AS1428 approved. It is equipped with deep stainless steel bowls and the robust easy-to-use bump-action electronic controls are designed for use by people with physical disabilities.

The Chill Fountain comes with a choice of five- or sub-micron filters which are housed out of site with the chilling unit behind secure lockable stainless steel access panels. A filter change reminder light indicates when filter replacement is due.

### Zip Wall Fountain

Zip Wall Fountain is a recessed chilled water system designed to save space and is ideal for installation in busy corridors.

It is equipped with a bubbler and carafe filler, dispenses 140 glasses of chilled filtered water per hour and comes with a choice of five- or sub-micron filters. A filter change reminder light indicates when filter replacement is due.

The chilling and filtration unit is housed behind a secure stainless steel lockable access panel.
